

RNIB Learning Choices

If you're looking for flexible,
accessible eLearning, we can help.

RNIB

Learning
Choices

As a charity offering multiple services to a diverse audience we understand the challenges faced by not-for-profit organisations.

RNIB Learning Choices is a purpose-built online platform offering comprehensive training for frontline staff, who are required to provide excellent customer services, in often challenging situations.

Our focus is on making eLearning interactive and engaging, inspiring people to connect with and apply new learning, knowledge and skills. eLearning can deliver training at a time and pace to suit learners, and reach a wide and geographically dispersed audience.

These bespoke courses are designed to help you to meet the needs and expectations of the people you engage with.

Our courses include:

- Customer service for people with sight loss
- Legislation and inclusion
- Communication matters
- How to guide people with sight loss
- Supporting customers with disabilities

We also offer courses covering sight loss in people with other conditions such as learning disability, dementia or stroke.

What's available?

For individuals

RNIB Learning Choices offers a selection of interactive courses which provide an all-inclusive understanding of sight loss for everyone. This online platform introduces practical skills which can be implemented immediately, increasing skill levels and boosting confidence.

For business

RNIB Learning Choices can offer you an off-the-shelf eLearning solution, or work closely with you and your team to create a learning mix that meets your unique business requirements; from a fully bespoke course to options for customisation from our range of existing courses.

All of our eLearning modules have been designed with the option of either a standard or accessible build. The accessible build will meet the needs of people with sight problems, including those who use access technology.

Learning Management System

You can access your eLearning courses via RNIB's Learning Management System where learners have access to individual, secure and accessible user-friendly workspace, or content can be streamed using your organisation's own facility.
